## Information regarding the cross-border merger between Sweden-domiciled Ruth Global Change Equities and Luxembourg-domiciled Ruth Global Change Equities

**Ruth Global Change Equities (SE) merges with Ruth Global Change Equities, a sub-fund of Ruth Asset Management SICAV (Lux)**

*Information for you as a unitholder in the absorbed fund.*

***The merger is a part of Ruth Asset Management AB's ("Ruth AM") (the management company) aim to enhance visibility of the fund range, provide investors and distributors easier access to the complete fund range within the same umbrella and optimise administrative resources to achieve higher operational efficiency. As part of this goal, we have decided to merge the Sweden-domiciled fund Ruth Global Change Equities, the absorbed fund, with Luxembourg-domiciled Ruth Global Change Equities, the receiving sub-fund, as of 28 June 2024.***

The absorbed fund and the receiving sub-fund have similar investment objectives and policies, and they are managed by the same investment team. We wish to merge the two funds to sharpen Ruth AM's selection of funds offered and to make fund management more efficient.

This is a merger by absorption, whereby the absorbed fund's holdings, including its assets and liabilities, will be transferred to the receiving sub-fund, and cease to exist. Ruth AM bears any costs related to legal, advisory and administration costs that arise in relation to the merger.

### **How you as an investor in the absorbed fund are affected**

As an investor in the absorbed fund, you are not required to act, but you should be familiar with the merger. The merger does not have any foreseeable

impact on your investment. The investment objective and strategy in the receiving sub-fund remain unchanged. The receiving sub-fund is subject to a 0,01% tax d'abonnement in share class A (Institutional investor) and 0% in share class C (Pension investor) in Luxembourg, while the absorbed fund is not subject to any similar tax in Sweden.

The merger will not lead to dilution effects in the receiving sub-fund, but minor portfolio rebalancing may take place prior to the merger in the absorbed fund and after the merger in the receiving sub-fund, which might incur transaction costs related to legal, advisory, and administration that arise in relation to the merger. Such costs will be paid by the management company.

As a unitholder in the absorbed fund, it is important for you to understand how the merger affects you. Please read the receiving sub-fund's KID-document of Ruth Global Change Equities carefully, found at the end of this notice. Your investment will be automatically converted to Ruth Global Change Equities unless you choose to redeem your units before the merger.

As a unitholder in the absorbed fund, you will have the right to redeem your units free of charge (excluding redemption fees charged by the absorbed fund to cover divestment fees and except for the fees acquired by the absorbed fund to prevent dilution of shareholders investment) at the applicable net asset value per share within the merger timeline below. You will also have the right to convert your units in another UCITS with similar investment policies and managed by Ruth AM free of charge within the merger timeline below. More information regarding the merger can be found at [www.ruthassetmanagement.com](http://www.ruthassetmanagement.com) or by email to [info@ruthassetmanagement.com](mailto:info@ruthassetmanagement.com).

## Merger timeline

- **20 May 2024:** Beginning of redemption and conversion period.
- **19 June 2024:** The possibility to redeem without any other fees ceases to exist
- **27 June 2024:** The calculation of the exchange ratio is performed while the absorbed fund is closed.
- **28 June 2024:** The merger takes effect, and the absorbed fund ceases to exist whilst the receiving sub-fund is being launched.
- **1 July 2024:** The receiving sub-fund opens for trading.

After the merger has been implemented, unitholders of the absorbed fund who chose not to redeem their units, will then become shareholders of the receiving sub-fund, and will be able to exercise the same rights in the receiving sub-fund as they did in the absorbed fund.

Any accrued income in the absorbed fund will be transferred over to the receiving sub-fund. The receiving sub-fund will not have any accrued income at the merger date.

### WHAT ARE THE RISK FACTORS AND WHAT COULD I GET IN RETURN?

#### Risk indicator

**The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The product has no end date.**

The summary risk indicator provides guidance on the level of risk of this product compared to other products. It shows how likely it is that the product will decrease in value due to market developments. We have classified the product as 4 out of 7, which is a medium risk class. This means that the sub-fund has a medium risk of ups and downs in the share value. The indicator above all reflects ups and downs in the sub-fund shares the sub-fund is invested in.

Risks not captured by the risk indicator:

**Counterparty risk** – arises if a counterparty does not fulfill its obligations towards the sub-fund, for example by not paying a set amount or not delivering securities as agreed.

**Operational risk** – the risk of loss due to, for example, system failure, errors caused by human factors or external events.

This product does not contain any protection against future market performance. You may lose all or part of it.

## Performance scenarios

The figures include all the costs of the product itself but may not include all the costs you pay to your adviser or distributor. The figures do not consider your personal tax situation, which can also affect how much you get back. What you get from this product depends on future market performance. Future market developments are uncertain and cannot be predicted precisely. The unfavourable, moderate, and favourable scenarios show the worst, average and best performance of the product over the past 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. The scenarios occurred for an investment between 2013-2023. Past performance is not an exact indicator of future performance. It can help you to assess how the sub-fund has been managed in the past. What you get will vary depending on how the market develops and how long you keep the product.

## WHAT HAPPENS IF RUTH ASSET MANAGEMENT SICAV IS UNABLE TO PAY OUT?

Each fund must have a dedicated depositary to take care of the safekeeping of the sub-fund's assets. There is a potential default risk if the assets of the sub-fund held with the depositary are lost. However, such default risk is limited due to the segregation of assets between those of the depositary and the sub-fund. The depositary is liable to the sub-fund or to the investors of the sub-fund for the loss by the depositary or one of its delegates of a financial instrument held in custody unless the depositary can prove that the loss has arisen as a result of an external event beyond its reasonable control. For all other losses, the depositary is liable in case of its negligent or intention failure to properly fulfil its obligations pursuant to the Luxembourg law of 17 December 2010 relating to undertakings for collective investment. There is no other compensation or guarantee scheme for investors in the sub-fund.

## WHAT ARE THE COSTS?

The person advising on or selling you the product may charge other costs. If so, this person will provide you with information about these costs and how they affect your investment. If the sub-fund is part of another product, such as unit-linked insurance, there may be other costs for that product.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- SEK 100,000 invested.

Example investment SEK 100,000	If you redeem after 1 year	If you redeem after 5 years
<b>Total cost</b>	<b>SEK 1,960</b>	<b>SEK 14,400</b>
<b>Annual cost impact*</b>	2,0%	2,0% every year

\* This illustrates how costs reduce your return each year during the holding period. This shows, for example, that if you redeem at the recommended holding time, your average return per year is estimated to be 11,1% before costs and 9,1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
